SUPPLEMENT TO REPORT #

25X1

THIS IS UNEVALUATED INFORMATION

1. The Hungarian radar network is divided into two divisions. The 54th Division covers all the area east of the Danube River with Division Headquarters at Kecskemet 4654N1941E. The western division covers all the area west of the Danube River. Each division had eight radar sites under its control, all sites reporting to its respective division headquarters who in turn reported to the main control center in Budapest. Prior to January 1955 the complete country was under one air division but a change was made to two divisions after an unidentified aircraft flew the length of the country without being picked up on any of the radar sets. All the Commanders were relieved immediately after this and all new Soviet equipment was installed. 25X1

2. The Budapest radar station (413245N1859E) has P-20 and P-3 radar sets. For location see Attachment 17. the Budapest station was moving because of interference from the surrounding mountains. The new location is to be Filis Hegyek 474125N185220E for location see Attachment 2/which is on much higher ground and there will be much less interference for the P-20 radar set. 25X1

3. The Szeged radar station 461702N200605E, for location see Attachment 3/ two kilometers northwest of town, has P-1 and P-3 radar sets. The Kecskemet radar station 4653N1941E, located five kilometers south of the city on a military airport, has P-20 and P-8 radar sets. There is a radar station at Debrecen, 4731N2139E it has a P-8 radar set. There is a radar station at Batvan, 4740N1941E, four to five kilometers west of the town on the Budapest highway, located 200 to 300 meters from the highway, which has a P-3 or P-8 radar set. Bekescsaba, 4631N2105E, has a radar station about four to five kilometers west of the town with a P-20 and P-8 radar set. There is a radar station at Janoshalma, 4618N1919E, about five kilometers northeast of the town near Kiskunhalas which has a P-8 or P-3 radar set. the A Command intended to install a big set at this location either a P-20 or a P-1. At Mezocsat, 4749N2054E, about four to five kilometers south-south west of the town there is a radar station with a P-20 set. 25X1

4. The following radar locations were in the western division. they were located, namely; Sormas 4627N1655E; Marchli 4635N1725E; Gorombotapolea 4803N2045E, and Szolnok 4710N2011E. 25X1
